

FIG. 1 is a block diagram of a system architecture. The system includes a central KERNEL (101) which is connected to four products (Product A, Product B, Product C, Product X) and four platforms (Platform A, Platform B, Platform C, Platform D). The KERNEL is also connected to three databases: Product Description Database (103), Platform Preference Database (105), and Application Definition Database (107). A User Interface (102) is connected to the KERNEL via an Internet Browser, and the User Interface is also connected to a Test Results Database (109). The Test Results Database is connected to the four platforms.
